

MAJOSZ AUTOMOTIVE XHIBITION

Hungary's first online trade fair for the automotive industry

Date: July 14-17, 2020.

Place: ONLINE

HEPA

Export and More

Our world has completely changed and will very likely never be the same again as it was last year. Most events, exhibitions, expos have been canceled or postponed and even if the gates reopen, there will still be plenty of time for the masses' confidence in events with thousands of people to be re-established. **MAJOSZ AUTOMOTIVE XHIBITION 2020 (MAX2020)** is a solution that fills the gap caused by the epidemic between exhibitors, customers and event organizers. It provides an opportunity to organize an exhibition that resembles previous, traditional events until the speech. All this for a fraction of the usual prices, while the number of visitors can be many times higher than what has been experienced so far. Our main professional partner in organizing the event is the **HEPA Hungarian Export Promotion Agency**.

MAX2020 is Hungary's first online trade fair for the automotive industry, which is open to a number of companies that define and embrace industrial digitization, machine tool manufacturing, industrial logistics, software, and Industry 4.0 sectors.

The Association of the Hungarian Automotive Suppliers (MAJOSZ) aims to represent, support and connect the Hungarian automotive suppliers, service providers and R&D development suppliers

both in Hungary and internationally in order to improve the competitiveness of our local manufacturers. We supply information about main trends, future programmes and plans of developments (e.g. governmental or EU policies). We connect businesses together by organising many different events. By supplying information and connecting the right businesses together we help our members to grow their business potentials.

HEPA Hungarian Export Promotion Agency Nonprofit, Inc. (HEPA) aims to provide professional services and incentives to Hungarian companies to launch their products and services abroad. We provide a wide range of services to facilitate the export activities of Hungarian companies in line with the goals specified in the National Export Strategy. We support international trade relations through market research, business consultancy and export-oriented trainings. In addition to market-specific information, we provide our partners with intercultural knowledge necessary for successful business operations,

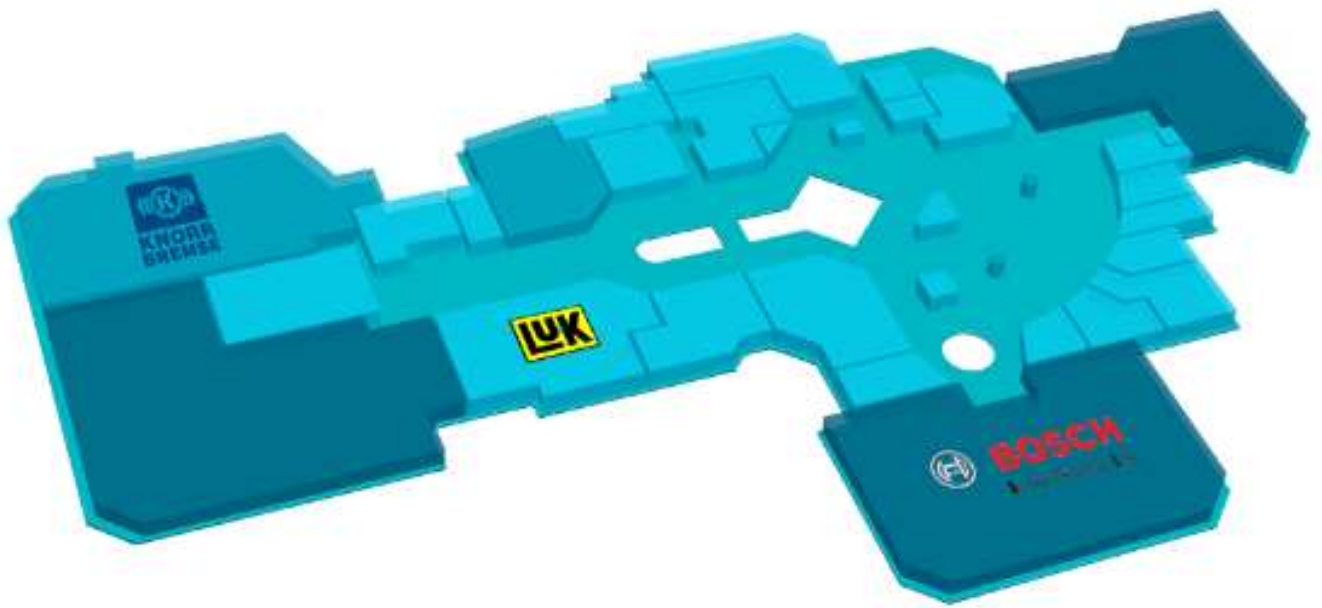

as well as assist them in exploring foreign market opportunities, and in identifying, developing and supporting internationally competitive Hungarian companies, products and services.

Hungarian exports have broken the record each year since 2014, and entering foreign markets is a great opportunity for domestic companies. Export activity contributes to long-term growth, results in a shift in strategic approach, company culture and increases productivity. World-class Hungarian products may be launched in international markets as a result of HEPA's economic diplomacy efforts and business relationships.
